K	Key Notes:
1	1. The National - Civil Construction role is a mandatory requirement for all RIW cardholders who conduct work on the in "Civil" site locations where the work is not considered Rail Safety Work with no potential risk to
t	the current or future safe railway operations

2. The Relevant Network Operator Role is mandatory for RIW cardholders who has carried out, is carrying out, or is considered to be a rail safety worker or working in the Rail Corridor

3. The information contained in this matrix is for reference only and could be subject to change from the Rail Transport Operators
4. If the applicable equivalent Unit of Competence (UoC) isn't an available option in the Competence grouping in the RIW system, please contact info@riw.net.au to request a review and update

Rule	
M = Required	Mandatory to be uploaded
M* = Group	At least one competence from the group must be uploaded
C = Conditional	Required for RIW cardholders who has carried out, is carrying out, or is considered to be a rail

Role Descriptors	
Auto Electrician - National	An auto electrician is a tradesperson specialising in electrical wiring of motor vehicles Auto
	electricians may be employed in the installation of new electrical components or the maintenance and repair of existing electrical components
Boilermaker - National	A boilermaker is a qualified tradesperson in which the primary work is to produce steel
	fabrications from plates and tubes, along with providing specialist welding services
Bricklayer - National	A bricklayer is a qualified tradesperson who lays bricks to construct brickwork
Carpenter - National	Carpentry is a qualified trade in which the primary work performed is the cutting, shaping and
	installation of building materials during the construction of buildings, timber bridges, concrete formwork, etc
Electrician - National	Installs, tests, connects, commissions, maintains and modifies electrical equipment, wiring and
	control systems Registration or licensing is required
Electronic Trades - National	Electronics technicians help design, develop, test, manufacture, install, and repair electrical and electronic equipment such as communication equipment, medical monitoring devices,
	navigational equipment, and computers They may be employed in product evaluation and
	testing, using measuring and diagnostic devices to adjust, test, and repair equipment
Site plant repairer/maintainer - National	A plant repairer/maintainer is a person whose job is to assemble, adjust, repair, maintain or install machinery or equipment
Formworker - National	A qualified person who constructs temporary or permanent moulds into which concrete or similar materials are poured
Mechanic - National	A mechanic is a qualified tradesperson who performs mechanical work on mobile vehicles and
	plant
Plumber - National	A plumber is responsible for installing, repairing and maintaining pipes, fixtures and other plumbing used for water distribution and waste water disposal in commercial and residential
	· · ·
Refrigeration - National	Refrigeration Technicians, commonly known as Refrigeration Mechanics, repair, install and
	troubleshoot refrigeration systems They can work on industrial or residential climate-control systems, such as HVAC units and refrigerated storage units
Rigger - National	A dogman or rigger specialises in the lifting/moving of large and heavy pipes and equipment They
	must work together to ensure the slings are safely placed on the equipment to be lifted and that the slings are loaded onto the crane's hooking correctly A dogman or rigger then directs the
	crane operator by either radio or hand signals to advise him when the load can be lifted and
	moved Although not a physically demanding role, they are required to work on uneven ground
	and are constantly looking overhead watching the crane's hook
Scaffolder - National	Scaffolders erect, alter and dismantle temporary scaffolding structures that provide work
	platforms and stairway access to building sites
Sheet Metal Worker - National	A sheet metal worker is a qualified tradesperson who creates, installs, and repairs sheet metal products
Steel Fixer - National	Steel fixers position and assemble steel bars and mesh sheeting with ligatures to form
Steel Fixer - National	reinforcement for concrete structures such as concrete slabs, columns, drainage and
	communication pits, walls and concrete barrier structures Steel fixing is the mould created prior
	to pouring the concrete
Abrasive Blaster - National	Abrasive blasting is using pressurized air or water to propel abrasive media against a surface to remove coating, corrosion, or contamination
Arborist - National	Arborists specialise in the care of trees
Asbestos Removalist	There are two types of licences for asbestos removal – Class A and Class B
	Class B licence holders are only permitted to perform Class B asbestos removal work, which
	means asbestos removal work (other than limited asbestos removal work) involving the removal of:
	non-friable asbestos, or
	asbestos-contaminated dust associated with or derived from the removal of non-friable asbestos
	Class A licence-holders are permitted to perform Class B and Class A asbestos removal work, which means asbestos removal work (other than limited asbestos removal work) involving the
	removal of:
	friable asbestos, or
	asbestos-contaminated dust (other than asbestos-contaminated dust associated with or derived from the removal of non-friable asbestos)
	non the removal of non-made assessory
Belt Technician - National	Conveyor Belt Technicians work with a range of machinery and polymer materials, including
	rubber, polyurethanes and HDPE Their work involves keeping conveyor belt systems operating
Civil Labourer - National	Civil Construction Workers work on civil construction and infrastructure projects performing a
	variety of physical task for example, shovelling, digging, graffiti Removal, General Civil Labouring /
	Maintenance activities
Cleaner - National	A person employed to help maintain clean facilities and living areas, crib sheds etc for workers and public
Communication Technician - National	Communication technicians install, maintain, test and repair wiring or cable networks, as well as
1	consumer or business communication equipment
Concreter	Pours, spreads, smoothes and finishes concrete for structures such as floors, stairs, ramps, footpaths and bridges
Concreter Confined Space Worker - National	footpaths and bridges A 'confined space' is defined as an enclosed or partially enclosed space that:
	footpaths and bridges A 'confined space' is defined as an enclosed or partially enclosed space that: is not designed to be occupied by a person, and
	footpaths and bridges A 'confined space' is defined as an enclosed or partially enclosed space that: is not designed to be occupied by a person, and is intended to be at normal atmospheric pressure while any person is in the space, and is or is
	footpaths and bridges A 'confined space' is defined as an enclosed or partially enclosed space that: is not designed to be occupied by a person, and is intended to be at normal atmospheric pressure while any person is in the space, and is or is likely to be a risk to health and safety from an unsafe oxygen level, or contaminants, including airborne gases, vapours and dusts, that may cause injury from fire or explosion, or harmful
	footpaths and bridges A 'confined space' is defined as an enclosed or partially enclosed space that: is not designed to be occupied by a person, and is intended to be at normal atmospheric pressure while any person is in the space, and is or is likely to be a risk to health and safety from an unsafe oxygen level, or contaminants, including
	footpaths and bridges A 'confined space' is defined as an enclosed or partially enclosed space that: is not designed to be occupied by a person, and is intended to be at normal atmospheric pressure while any person is in the space, and is or is likely to be a risk to health and safety from an unsafe oxygen level, or contaminants, including airborne gases, vapours and dusts, that may cause injury from fire or explosion, or harmful
Confined Space Worker - National	footpaths and bridges A 'confined space' is defined as an enclosed or partially enclosed space that: is not designed to be occupied by a person, and is intended to be at normal atmospheric pressure while any person is in the space, and is or is likely to be a risk to health and safety from an unsafe oxygen level, or contaminants, including airborne gases, vapours and dusts, that may cause injury from fire or explosion, or harmful concentrations of any airborne contaminants, or engulfment
Confined Space Worker - National	footpaths and bridges A 'confined space' is defined as an enclosed or partially enclosed space that: is not designed to be occupied by a person, and is intended to be at normal atmospheric pressure while any person is in the space, and is or is likely to be a risk to health and safety from an unsafe oxygen level, or contaminants, including airborne gases, vapours and dusts, that may cause injury from fire or explosion, or harmful concentrations of any airborne contaminants, or engulfment Demolition workers demolish, dismantle and remove building structures and materials including
Confined Space Worker - National Demolition Worker - National	footpaths and bridges A 'confined space' is defined as an enclosed or partially enclosed space that: is not designed to be occupied by a person, and is intended to be at normal atmospheric pressure while any person is in the space, and is or is likely to be a risk to health and safety from an unsafe oxygen level, or contaminants, including airborne gases, vapours and dusts, that may cause injury from fire or explosion, or harmful concentrations of any airborne contaminants, or engulfment Demolition workers demolish, dismantle and remove building structures and materials including brick, timber, concrete and metal
Confined Space Worker - National Demolition Worker - National	footpaths and bridges A 'confined space' is defined as an enclosed or partially enclosed space that: is not designed to be occupied by a person, and is intended to be at normal atmospheric pressure while any person is in the space, and is or is likely to be a risk to health and safety from an unsafe oxygen level, or contaminants, including airborne gases, vapours and dusts, that may cause injury from fire or explosion, or harmful concentrations of any airborne contaminants, or engulfment Demolition workers demolish, dismantle and remove building structures and materials including brick, timber, concrete and metal A Driller's Offsider, or a Driller's Assistant, is someone who helps to set up and operate drilling
Confined Space Worker - National Demolition Worker - National Driller Offsider - National	footpaths and bridges A 'confined space' is defined as an enclosed or partially enclosed space that: is not designed to be occupied by a person, and is intended to be at normal atmospheric pressure while any person is in the space, and is or is likely to be a risk to health and safety from an unsafe oxygen level, or contaminants, including airborne gases, vapours and dusts, that may cause injury from fire or explosion, or harmful concentrations of any airborne contaminants, or engulfment Demolition workers demolish, dismantle and remove building structures and materials including brick, timber, concrete and metal A Driller's Offsider, or a Driller's Assistant, is someone who helps to set up and operate drilling rigs
Confined Space Worker - National Demolition Worker - National Driller Offsider - National Drug Testing Officer - National	footpaths and bridges A 'confined space' is defined as an enclosed or partially enclosed space that: is not designed to be occupied by a person, and is intended to be at normal atmospheric pressure while any person is in the space, and is or is likely to be a risk to health and safety from an unsafe oxygen level, or contaminants, including airborne gases, vapours and dusts, that may cause injury from fire or explosion, or harmful concentrations of any airborne contaminants, or engulfment Demolition workers demolish, dismantle and remove building structures and materials including brick, timber, concrete and metal A Driller's Offsider, or a Driller's Assistant, is someone who helps to set up and operate drilling rigs The Drug and Alcohol Testing (DAT) Officer is responsible for administering drug and alcohol tests on specified employees in accordance with relevant legislation and departmental policy
Confined Space Worker - National Demolition Worker - National Driller Offsider - National	footpaths and bridges A 'confined space' is defined as an enclosed or partially enclosed space that: is not designed to be occupied by a person, and is intended to be at normal atmospheric pressure while any person is in the space, and is or is likely to be a risk to health and safety from an unsafe oxygen level, or contaminants, including airborne gases, vapours and dusts, that may cause injury from fire or explosion, or harmful concentrations of any airborne contaminants, or engulfment Demolition workers demolish, dismantle and remove building structures and materials including brick, timber, concrete and metal A Driller's Offsider, or a Driller's Assistant, is someone who helps to set up and operate drilling rigs The Drug and Alcohol Testing (DAT) Officer is responsible for administering drug and alcohol tests on specified employees in accordance with relevant legislation and departmental policy position wooden, concrete or metal posts and fix them to a base cut panels to size and fix them
Confined Space Worker - National Demolition Worker - National Driller Offsider - National Drug Testing Officer - National	footpaths and bridges A 'confined space' is defined as an enclosed or partially enclosed space that: is not designed to be occupied by a person, and is intended to be at normal atmospheric pressure while any person is in the space, and is or is likely to be a risk to health and safety from an unsafe oxygen level, or contaminants, including airborne gases, vapours and dusts, that may cause injury from fire or explosion, or harmful concentrations of any airborne contaminants, or engulfment Demolition workers demolish, dismantle and remove building structures and materials including brick, timber, concrete and metal A Driller's Offsider, or a Driller's Assistant, is someone who helps to set up and operate drilling rigs The Drug and Alcohol Testing (DAT) Officer is responsible for administering drug and alcohol tests on specified employees in accordance with relevant legislation and departmental policy
